

Ensuring that teaching leads to learning is a constant need across all societies. School administrators running pen and paper-based assessments have been grappling with the possibilities around augmenting technology to monitor these learning outcomes.

Digitally aggregating and analysing such physical data at scale poses significant challenges.

Presenting **SARAL**

an easy-to-use smartphone app that allows teachers / administrators to effortlessly capture assessments of students that is done on paper - and store it digitally in a structured format.

Can be easily leveraged for efficient data capture at scale. It saves time & effort, and helps realize value from data in a timely fashion.

SARAL is

QUICK

RELIABLE

ACCURATE

SCALABLE

**COST
EFFICIENT**

Faster, cheaper and more accurate - than manual data entry

Allows for breaking down of large scale projects across a large workforce, so that individual users manage only a small chunk of the work, yet the overall objective is achieved at scale

Offers the user the flexibility to use in areas that lack connectivity and sync the data later when online.

Uses familiar tech - smartphone app

The same tool and process can be leveraged for a variety of use-cases - no new learning curve

Enable **timely and accurate** capture of assessment results **at scale** - allowing for effective teaching interventions to be carried out.

SARAL provides a packaged offering which can expedite your solution rollout:

Technology

Open source software packaged as high quality, secure, well documented, quickly deployable, cloud ready solutions

Program

Guidelines for Policy, Program design and Rollout Plan

Implementation

Trained/Training of Service Providers to implement solutions, program manage, & innovate on top!
